Notes:

- * Due to a shortage of officers, Jon Binegar was randomly chosen, and his score was applied to two different teams.
- ** The officers (only) of the top three teams based on their 4 target score total participated in a shootout to determine first, second and third place overall. They shot an additional 10 bull target. The result of that round was added to their team's original, 4 target score total to determine the top three places. Fourth place downward was based on the remaining teams' 4 target score total. (Payton had to leave early and was replaced by her partner for the shootoff. Harold, (a One Buck Club member), had his handicap SUBTRACTED from his score to simulate her score for fairness.)
